

Fraunhofer

TESTED[®] DEVICE

Tarkett AB
iQ Granit

Report No. TA 1411-738

Qualification Certificate

This is to certify that the product mentioned above, provided by

Tarkett AB
Ronneby, Sweden

has been awarded a Fraunhofer certificate TESTED DEVICE bearing the report number TA 1411-738.

The outgassing behavior of the named material at the stated temperatures was investigated according to VDI 2083-17. Based on the outgassing rates determined for the specific surfaces, the following material classification was made for the corresponding contaminant group:

Test temperature	Contaminant group	Specific emission rates [g/m ² s]	ISO-ACC _m class (x)
23 °C	Inorganic acids (ac)	< 7.2 x 10 ⁻¹⁰	-9.1
90 °C	Inorganic acids (ac)	Not detectable	--

The detection limit at the time of the test was ISO-ACC_m Class = -9.1 (ac). The ISO-ACC_m Class (x) was assigned for the named contaminant group x at the test temperature of 23 °C (room temperature).

Detailed information and parameters of the test environment can be found in the Fraunhofer IPA test report.

Stuttgart, January 28, 2015

i.A. 
Frank Bürger, Project manager Fraunhofer IPA

DUPLICATE

The validity of this certificate applies only to the mentioned product in this particular condition for a duration of 5 years.
