Test result/Classification

When operated under the specified test conditions, the cable system series Coroflex Cleanroom 2100 is suitable for use in cleanrooms fulfilling the specifications of the following Air Cleanliness Class according to ISO 14644-1:

| Test parameter(s) | Air Cleanliness Class |
|---|-----------------------|
| $v_1 = 0.5 \text{m/s}; a_1 = 1.0 \text{m/s}^2$ | 3 |
| $v_2 = 1.0 \text{m/s}; a_2 = 2.0 \text{m/s}^2$ | 4 |
| $v_3 = 2.0 \text{m/s}; a_3 = 4.0 \text{m/s}^2$ | 4 |
| Overall result | 4 |

The measuring devices used for the qualification tests are calibrated at regular intervals; their results can be traced back to national and international standards. In cases where no national standards exist, the test procedure implemented complies with the technical regulations and norms applicable at the time of the test. The relevant documentation can be viewed on request at any time.
